

OUTLINE OF VISION SERVICE PLAN BENEFITS

Vision Service Plan has dictated to us that all patients currently wearing contact lenses or requiring renewal of a contact lens prescription must choose to use their benefits toward **EITHER** contact lenses **OR** eye glasses. ***They will not cover both.***

Please note that the doctor cannot renew your current contact lens prescription or order new contact lenses for you without proper evaluation of your current contact lenses. However, Vision Service Plan will not cover or reimburse you for the contact lens evaluation portion of your comprehensive eye exam.

Our regular contact lens evaluation fee is \$35.00. Fox Valley Ophthalmology offers you a 15% courtesy discount, bringing your fee down to \$30.00. *This fee is due and payable on the date of your contact lens evaluation.*

This evaluation includes:

- The age, condition, and parameters of your contact lenses
- An assessment of how the lenses currently fit on your eye
- A determination that your current lenses are not compromising the health of your eyes.

A contact lens **fitting** is an additional fee, currently starting at \$125 and up, and is required if:

- You have never worn contact lenses before
- You were fitted into contacts at another practice and your contact lens prescription is unknown to us
- A change of contact lens type, material or design is needed
- Your RGP is warped.

The doctors and staff of Fox Valley Ophthalmology are well trained to help you maximize your benefits, but are bound to follow the dictates of your vision plan.
